PLM push-to-connect forged fittings are nickel-plated and have an FKM seal making them suitable for use with liquids and gaseous fluids compatible with these components. PLM fittings are plated with a high phosphorus FDA nickel-plate allowing these fittings to be used in applications where exposure to aggressive environments is present.

The high phosphorus FDA nickel-plate is resistant to water, harsh detergents and other aggressive fluids and environments resulting in a superior chemical, corrosion and abrasive resistant push-to-connect fitting line. All items in the PLM range are silicone free.
